

Welcome to the Oracle SQL (Step by Step Approach) program!!

I am very excited to have you here and I request you to follow the below guidelines to get the most out of this program.

1. Install Oracle Database software as explained in Lecture 4
2. Install Java SDK as explained in Lecture 5
3. Install SQL Developer as explained in Lecture 6
4. Run all the scripts(Attached in Lecture 8) necessary for the course as explained in Lecture 7
5. Practice the Lab Exercises attached after each section. This ensures a smooth transition to the next section.
6. Please feel free to start any discussion and I will get back to you at the earliest!!!

How to Contact Me

There are two ways to contact me via Udemy. My preference is that you contact me by starting a discussion from within the course. This allows others who are experiencing a similar problem to jump into the conversation so we can all learn from each other and this really enhances the course. If you wish to discuss your course privately, you are of course welcome to send me a message directly as well.
